# GREENING & REVITALIZING

Greening and revitalizing land or areas have become essential needs that require expertise and precise calculations to ensure that the time, cost, and energy expended result in a lush and optimal space.

The skill of creating landscape gardens encompasses various aspects of spatial arrangement, such as zoning, flow of access for mobilization, and the utilization of limited land space.

We offer the convenience of greening and revitalizing land or areas in workplace environments, residential areas, public roads, and other locations.

# ROOF GARDEN & GREEN WALL / VERTICAL GARDEN

Roof Gardens and Green Walls/Vertical Gardens have currently become innovations as well as solutions in creating green open spaces, which are increasingly difficult to find in large cities.

Roof Gardens and Green Walls/Vertical Gardens can serve as solutions in creating gardens when the available land in houses, apartments, offices, and the like is limited.

We offer the convenience of constructing Roof Gardens and Green Walls/Vertical Gardens to optimize the land you have.
